2007-2011 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Chicago city, Illinois				
	Total		Male		Female
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate
Population 18 to 24 years	296,972	+/-2,801	147,169	+/-1,994	149,803
Less than high school graduate	19.4%	+/-0.5	23.1%	+/-0.9	15.8%
High school graduate (includes equivalency)	26.9%	+/-0.6	28.3%	+/-0.9	25.6%
Some college or associate's degree	36.8%	+/-0.7	34.2%	+/-1.0	39.3%
Bachelor's degree or higher	16.8%	+/-0.4	14.4%	+/-0.6	19.3%
Population 25 years and over	1,772,555	+/-3,644	843,395	+/-3,146	929,160
Less than 9th grade	9.7%	+/-0.2	10.0%	+/-0.2	9.5%
9th to 12th grade, no diploma	10.1%	+/-0.2	10.6%	+/-0.2	9.7%
High school graduate (includes equivalency)	23.7%	+/-0.3	24.5%	+/-0.4	23.0%
Some college, no degree	18.1%	+/-0.2	17.5%	+/-0.3	18.6%
Associate's degree	5.5%	+/-0.1	4.9%	+/-0.2	6.0%
Bachelor's degree	19.9%	+/-0.2	19.7%	+/-0.3	20.0%
Graduate or professional degree	13.0%	+/-0.2	12.7%	+/-0.2	13.3%
Percent high school graduate or higher	80.2%	+/-0.2	79.4%	+/-0.3	80.8%
Percent bachelor's degree or higher	32.9%	+/-0.3	32.5%	+/-0.3	33.3%
Population 25 to 34 years	507,289	+/-3,364	250,610	+/-2,110	256,679
High school graduate or higher	87.3%	+/-0.4	85.4%	+/-0.6	89.2%
Bachelor's degree or higher	46.3%	+/-0.5	42.8%	+/-0.7	49.8%
Population 35 to 44 years	379,906	+/-2,844	191,543	+/-1,933	188,363
High school graduate or higher	83.1%	+/-0.5	82.1%	+/-0.6	84.0%
Bachelor's degree or higher	35.2%	+/-0.6	34.3%	+/-0.9	36.1%
Population 45 to 64 years	604,817	+/-2,850	288,974	+/-1,890	315,843
High school graduate or higher	79.1%	+/-0.4	78.1%	+/-0.5	80.1%
Bachelor's degree or higher	27.0%	+/-0.4	26.8%	+/-0.5	27.2%
Population 65 years and over	280,543	+/-2,069	112,268	+/-1,230	168,275
High school graduate or higher	65.5%	+/-0.6	64.9%	+/-0.9	65.8%
Bachelor's degree or higher	18.3%	+/-0.6	21.2%	+/-0.8	16.3%

Subject	Chicago city, Illinois				
	Total		Male		Female
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate
POVERTY RATE FOR THE POPULATION 25 YEARS AND OVER FOR WHOM POVERTY STATUS IS DETERMINED BY EDUCATIONAL ATTAINMENT					
Less than high school graduate	29.1%	+/-0.7	24.5%	+/-0.7	33.5%
High school graduate (includes equivalency)	20.5%	+/-0.6	17.2%	+/-0.7	23.6%
Some college or associate's degree	15.4%	+/-0.5	12.5%	+/-0.6	17.7%
Bachelor's degree or higher	6.4%	+/-0.3	5.8%	+/-0.4	6.9%
MEDIAN EARNINGS IN THE PAST 12 MONTHS (IN 2011 INFLATION-ADJUSTED DOLLARS)					
Population 25 years and over with earnings	35,753	+/-251	39,272	+/-455	32,272
Less than high school graduate	20,169	+/-278	22,521	+/-535	16,376
High school graduate (includes equivalency)	25,668	+/-286	28,934	+/-572	21,759
Some college or associate's degree	32,368	+/-331	37,060	+/-610	29,195
Bachelor's degree	51,408	+/-436	57,945	+/-1,292	46,302
Graduate or professional degree	64,784	+/-882	76,875	+/-1,672	58,092

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
